

Looter stuck on Corp bookmark

Posted by kyertoff - 2019/02/16 22:57

Edited*

I was incorrect the looter is warping to corp bookmark then repeatedly broadcasting warp-to to the fleet.

Can you check new version before I release it for everybody? I made some changes for windows 10 support and need to properly test them before release. Take eveplotnew.exe from archive.

Still warps to corp bookmark and then right clicks it and broadcast warp-to.

Check bot version in about box. It should be 9.1.4

Running smooth no hiccups even. Thanks for the quick work I'll let you know if I notice any issues.

looter works but no longer removes or appears to attempt to remove the bookmark resulting in a loop.
